

ST. JOSEPH'S COLLEGE OF ENGINEERING AND TECHNOLOGY, PALAI.

(An ISO 9001:2015 Certified College)

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

B. TECH DEGREE FIRST INTERNAL TEST-October 2023

Seventh Semester (Elective)

CST 463 WEB PROGRAMMING

Time: 2 hours

Max. Marks: 50

PART A

Answer all questions (3 x 5 = 15 Marks)

Qn. No.	Question	Marks	K level of Qn.	CO & KL
1	What is MIME? Give examples of MIME types. State the reason why MIME type specification is necessary in a request-response transaction between a browser and server	3	K1	CO1&K3
2	Prepare the HTML code for the following task. Modify the URL of your college website to include a subdomain named 'Astra23' and add a web page named 'techfest.html' to this URL. Additionally, you need to create a link through the logo image 'astra.png' placed on a web page to access this new URL. The requirement is that the 'techfest.html' page should open in a new window when the link is clicked	3	K3	CO1&K3
3	Write down the syntax of video tag in HTML5. Recognize the role of control attribute in video tag. Use the 'Save Lives: Donate Blood' promotional video 'MySafety.mp4' on a web page with suitable HTML code, 'autoplay' option enabled and displayed in a standard dimension 750 X500.	3	K3	CO1&K3
4	Compare Absolute Positioning and Relative positioning in CSS?	3	K2	CO2&K3
5	Create an HTML document with embedded JavaScript that allows users to enter text in a Textbox. When the user clicks a button labelled "Click Me," the text they entered should be displayed in the document in bold and uppercase characters.	3	K3	CO2&K3

PART B

Qn. No 6,7 and 8 – Answer any 2

Qn. No.	Question	Marks	K level of Qn.	CO & KL
6	Write down the general format of an HTTP request and an HTTP response. What is the purpose of the following HTTP headers? Also, identify whether they are included with an HTTP header/response or both. i. host ii. last-modified	7	K1	CO1&K3

51 Name Roll No. 15 25/8/22 23/3/24 49	Write the equivalent HTML code to implement the following in a web page: (a) An image titled "sjcet.jpg" with a height of 500 pixels, width of 650 pixels and no border. If the image cannot be accessed, the message "SJCTET front view - not available" should be displayed. When clicking on the image, it should redirect to the default college domain. (b) Create a Nested unordered list describing various courses at SJCTET with relevant links and highlight the BTECH course with a different style (c) create a table with 3 rows and 5 columns for entering the mark list of 3 students. Assume suitable headings for each column. Also, provide a table caption.	7	K3	CO1&K3
8	How to add Hyperlinks to HTML pages? Explain internal linking within a web page and within specified locations of different web pages with suitable examples.	7	K2	CO1&K3
Part C Qn. No 9,10 and 11 – Answer any 2				
9	Explain style specification format in CSS. Discuss the various types of CSS properties and their values with suitable examples.	7	K2	CO2&K3
	What are class selectors in CSS? Suppose that it is required to display the text. content of p tags in two different styles depending			
10	on the context. Style 1 – text should be displayed in blue color, right aligned, underlined, with font style of italics and spacing between the words of text set to 2 cm. Style 2 – text should be displayed with a background colour of yellow, blue colour border, and with a padding of 1.5 cm Write the equivalent CSS style rules.	7	K3	CO2&K3
11/	Illustrate the different ways of Array declaration in JavaScript. Describe the following methods and generate the output for the JavaScript Array. var colors = ["red", "green", "blue", "yellow", "orange"]; (i) splice (ii) slice (iii) unshift	7	K2	CO2&K3
Part D Qn. No 12 is mandatory				
12	Illustrate the usage of JavaScript DOM in event handling and explain any three methods with example. Write a JavaScript program to find the roots of a quadratic equation, if three inputs are taken from the keyboard.	7	K3	CO2&K3

APJ ABDUL KALAM TECHNOLOGICAL UNIVERSITY

Seventh Semester B.Tech Degree Regular and Supplementary Examination December 2023 (2019 Scheme)

Course Code: CST463**Course Name: WEB PROGRAMMING****Max. Marks: 100****Duration: 3 Hours****PART A***Answer all questions, each carries 3 marks.*

Marks

- | | | |
|------|---|-----|
| 1 ✓ | Write the structure of HTML with example. | (3) |
| 2 ✓ | What is a URL? Explain the different parts of URL with example. | (3) |
| 3 ✓ | Explain id selector and class selector in CSS with suitable examples | (3) |
| 4 ✓ | Explain array creation in JavaScript with examples. | (3) |
| 5 ✓ | How to use functions in a PHP program with an example. | (3) |
| 6 ✓ | Distinguish between implode and explode function in PHP with suitable examples. | (3) |
| 7 ✓ | What is cookie? How does PHP support the concept of cookies | (3) |
| 8 ✓ | Write a simple connection script to make a connection to MYSQL with PHP. | (3) |
| 9 ✓ | Briefly explain JSON syntax with example. | (3) |
| 10 ✓ | Describe the schema of a document implemented in JSON with suitable examples. | (3) |

PART B*Answer any one full question from each module, each carries 14 marks.***Module I**

- 11 ✓ a) Write the equivalent HTML code to implement the following in a web page: (6)
- i. An image titled "flowers.jpg" with a height of 150 pixels and width of 250 pixels. If the image cannot be accessed, a message "No image available" should be displayed.
 - ii. A hyperlink to the URL "www.mysite.com/birds.jpg". The hyperlink should have the label "Click Here".
 - iii. An unordered list with values Tea, Coffee, Milk.

- 11) Write the HTML code for obtaining the following table. (8)

Flower Show	
Flower Name	Colour
Red Rose	Red
White Rose	White
Jasmine	
Sunflower	Yellow

OR

- 12 a) Explain list tags with example. (6)
- b) Write the HTML code for obtaining the following registration form, where the course field contains the options BCA, BBA, B. Tech, MBA, MCA, M. Tech. (8)

Firstname

Middlename:

Lastname:

Course :

Gender :

☐ Male

☐ Female

☐ Other

Phone :

Address

Email:

Password:

Re-type password:

Module II

- 13 a) Explain different levels of CSS Style Sheets with suitable example. (6)
- b) Write JavaScript program to find factorial of a number, use prompt dialog box to get the input from user. (8)

OR

- 14 a) Write CSS and the corresponding HTML code for the following: (8)

- i. Set the background color for the hover and active link states to "yellow".
 - ii. Set the list style for ordered lists to "lower case alphabet".
 - iii. Set "boat.jpg" as the background image of the page and set 3% margin for the page.
 - iv. Set dotted border for the document.
- b) Explain various types of control statements in JavaScript with example. (6)

Module III

- 15 a) Write a PHP program to compute the sum of the positive integers up to 100 using do while loop. (6)
- b) List the different ways to create an array in PHP with an example. Explain any 4 functions that deals with PHP array. (8)

OR

- 16 a) Explain the loops used in PHP with example. (8)
- b) Write equivalent PHP statements corresponding to the following: (6)
- i. Declare an associative array named "ages" to store the key-value pairs ("Harry", 21), ("Alice", 20), ("Megha", 22), ("Bob", 19).
 - ii. Modify the value associated with the key "Megha" to 28.
 - iii. Sort the array according to values maintaining the key-value relationships and print the sorted key-value pairs.
 - iv. The entry identified by the key "Alice".

Module IV

- 17 a) Design the HTML page which enters two numbers and embed the PHP code to display the sum, difference, product and quotient of these two numbers, when clicking the 'CALCULATE' button. (8)
- b) What are the uses of cookies in web pages? Describe syntax for setting cookies in PHP. How can you access and delete the cookie using setcookie() function? (6)

OR

- 18 a) What is a PHP session, explain how to start, modify and destroy session variables with example. (7)
- b) Explain CREATE, INSERT and SELECT operations on MySQL table with example. (7)

Module V

- 19 a) Explain the control structures in Blade Templating, (8)
b) Explain the methods of Laravel's resource controllers. (6)

OR

- 20 a) What is Route Model Binding in Laravel? Which types of route model binding are supported in Laravel? (6)
b) List the data types used in JSON? Explain the use of parse() and stringify() functions in JSON with examples (8)
